

“ Four years on from the pandemic, our national airport system has now surpassed pre-Covid traffic levels and is ahead of Germany’s traffic by 100 million passengers. As for Fiumicino, the airport is nearing capacity. Significant development investments are therefore needed to ensure that Italy remains competitive with other hubs which, thanks to simpler procedures, are able to develop more rapidly and attract intercontinental traffic. ”

PIERLUIGI DI PALMA

President of ENAC - Italian Civil Aviation Authority

Celebration Event for the 65th Anniversary of Leonardo da Vinci Airport in Fiumicino
