

*The sustainable development plan for Rome Fiumicino Airport will be a key strategic investment to strengthen the country's competitiveness and integration, showcasing Italian engineering and architecture.*

*The new masterplan for Leonardo da Vinci Airport, building on the international recognition received by the airport in recent years, fully belongs among the major infrastructure works that mark the history of our country and help make it great in the world, representing a concrete example of innovation, sustainability and long-term vision.*

*The investment is an essential driver for national economic growth and development, capable of generating positive spillover effects - not only in the relevant sector, but across the entire productive system, contributing significantly to job creation and to strengthening the country's economy.*

**GIORGIO LUPOI**
