

This further, significant green light for the expansion of Leonardo da Vinci Airport, involving a total investment of €9 billion, represents a long-term strategic decision.

We wish to express our full support to this project, which is crucial to the competitiveness of the Region and the entire country. It will strengthen Italy's main international gateway, generate employment, attract investment and support tourism, exports, and industrial sectors. This project is also a virtuous example of a proactive and responsible approach that we hope will also apply to the other strategic logistics hubs in Lazio. As clearly emerged from the Lazio Logistics Forum, the strengthening of integrated logistics – airports, ports, freight villages, rail and road links – is a decisive lever for the competitiveness of the production system, for attracting investments and positioning our region and Italy within major global value chains. In this context, we applaud Fiumicino's Mayor Mario Baccini and the City Council for their commitment and institutional vision in promoting the balanced growth of the airport and its connections, for the benefit of citizens and businesses.
