

“

*The project should not be seen merely as a revision of the Reserve's boundaries, but as a way of enhancing it.*

*The project includes the creation of a new Environmental Themed Park at the entrance to the Reserve.*

*We will go from an unusable and impassable reserve to a green heritage open to everyone. [...]*

*The changes to the northern territory will be offset by the creation of a space that citizens can finally enjoy, integrating industrial development with a real ecological benefit but above all allowing the principles of environmental and archaeological protection to coexist with the public enjoyment of the Reserve. [...]*

*In short, Fiumicino is choosing to think big. [...] The airport's new business plan isn't just an economic operation, but a social pact that brings together jobs,*

*health and the local community, making the airport an international example of sustainability and urban integration.*

”
