

This project is a virtuous example of a proactive and responsible approach. The further, significant green light for the expansion of Leonardo da Vinci Airport, involving a total investment of €9 billion, represents a long-term strategic decision.

It will make the country more competitive. We wish to express our full support for this project, which is crucial to the competitiveness of the Region and the entire country. It will strengthen Italy's main international gateway, generate employment, attract investment and support tourism, exports, and industrial sectors.

This project is also a virtuous example of a proactive and responsible approach that we hope will also apply to the other strategic logistics hubs in Lazio. In this context, we applaud Fiumicino's Mayor Mario Baccini and the City Council for their commitment and institutional vision in promoting balanced growth of the airport and its connections, for the benefit of citizens and businesses.
