

“

*This is a strategic choice for the country,  
and I am pleased that it falls within the  
strategies envisaged by the National Airports Plan.*

*Fiumicino is one of the most important airports in Europe and globally,  
its development plan is aligned with market needs and compatible  
with the quality of the works that need to be implemented.*

*I am confident that, with the necessary compensation to the city  
that we requested and obtained, we will soon be able to let the airport  
grow in harmony with the city, the region and the entire country.*

”

**MARIO BACCINI**

Mayor of Fiumicino  
National Airport Plan presentation
