

Rome and Italy will measure their ability to compete in major international tourist flows on the growth of Fiumicino Airport.

The Plan clearly recognizes the crucial importance of “Leonardo da Vinci” Airport and indicates the path for a sustainable development, also considering the traffic demand expected in coming years.

Rome Fiumicino's Master Plan represents a crucial industrial lever for Rome and, for the entire country, as well as an urgent matter that can no longer be postponed, requiring local and central institutions to act responsibly and within a clear timeframe.
