

## Checklist for Verifying Tools in the Maneuvering Area

Emitted by:	PH Movimento
Volume of Safety Rules:	1 – General Provisions
Ref. Par.:	1.16

*Section 1.16 is updated as follows.  
(changes/added text highlighted in grey)*

### • VERIFICATION CHECKLIST

#### 1.16 Checklist for Tool Verification in the Maneuvering Area

All companies operating in the maneuvering area, when required to use tools or materials, must:

- Minimize the tools and materials brought into the maneuvering area, limiting them to those strictly necessary for the specific intervention;
- Record the materials and tools brought into the maneuvering area on the dedicated form (Attachment 8 E-15 DDS – Tools and Materials Checklist for Maneuvering Area) before accessing the area;
- Remove all residual tools and materials from the work area upon completion of the activity;
- Perform a check of tools and materials after clearing the area by completing the aforementioned checklist, specifying the materials used for the activity and no longer available.

**Note:** The company may use equivalent internal forms, provided they contain the same information and include the same verification steps.
